### Personal statement

I am a young and promising software developer. Mostly, I am specialized on JVM-based languages like Java and Groovy. I have more than two years of developing back end as well as client Android applications. I am fond of learning something new, domesticating new technologies and expanding horizons of my knowledge.

### Core skills

#### Programming Languages / Technologies

- Java, Groovy
- Android
- Python
- JavaScript, HTML, CSS
- Bash
- SQL, HQL
- OOD & Design Patterns

#### Methodologies

- Agile
- SCRUM
- Kanban
- Waterfall

#### Frameworks

- Spring
- Hibernate
- JUnit
- JDBC
- slf4j, log4j

#### Application / Web Servers

- Tomcat
- Jetty

#### RDBMS

- MySQL
- HSQLDB
- SQLite3

#### Development Tools

- IntelliJ IDEA
- Android Studio
- Gradle advanced, Maven
- Git, Perforce
- Jenkins, Travis CI
- VirtualBox

#### Operating Systems

- Linux Mint, Ubuntu
- macOS
- Microsoft Windows

## Experience

### Software Engineer – Kyiv, Ukraine

*(June 2016 – Present)*

Developing and maintaining a large-scaled Android secure library. Designing automated test architecture.

#### Duties

- Developing Android Secure SDK
- Analysing and debugging code
- Automated test coverage
- Bug fixing
- Maintaining continuous integration server (Jenkins)

### Software Engineer – Kyiv, Ukraine

*(March 2016 – June 2016)*

Developing a full stack web application for managing zoo. It was a project in the SoftServe IT academy.

#### Duties:

- Feature implementing
